

Main activity shows all the folders

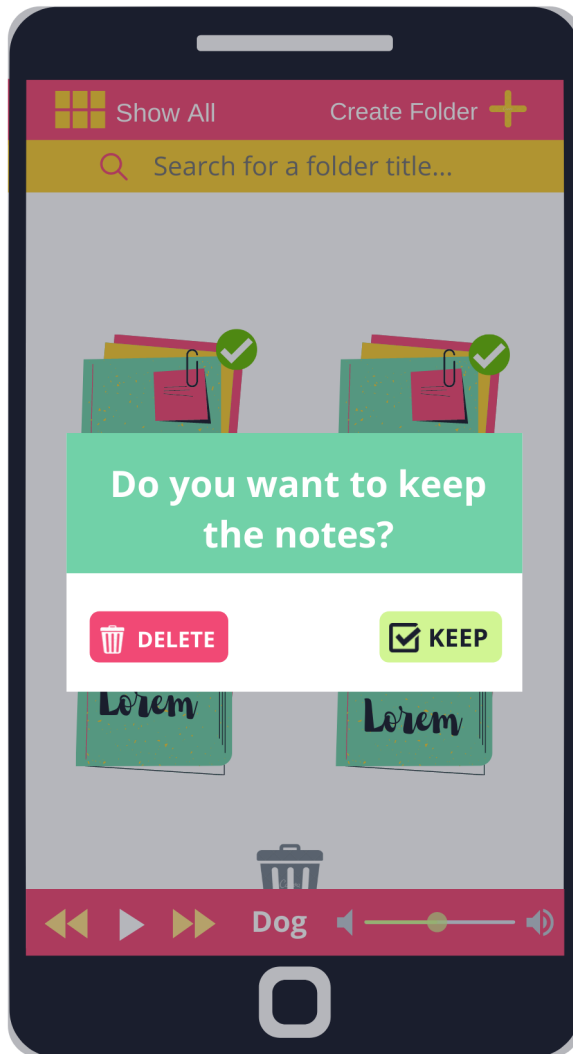

Bulk deleting selected folders

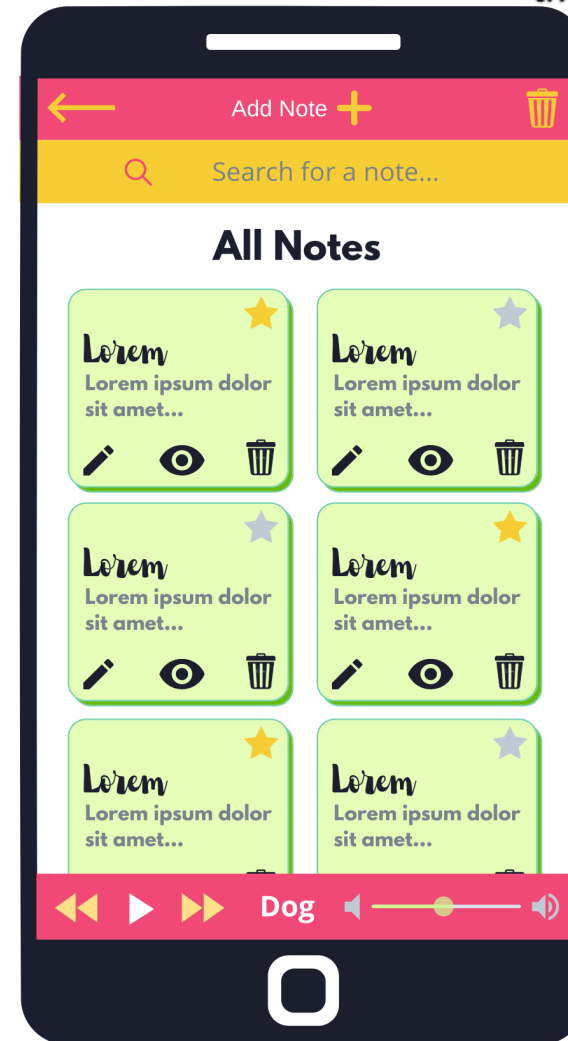

You can even keep
the notes!

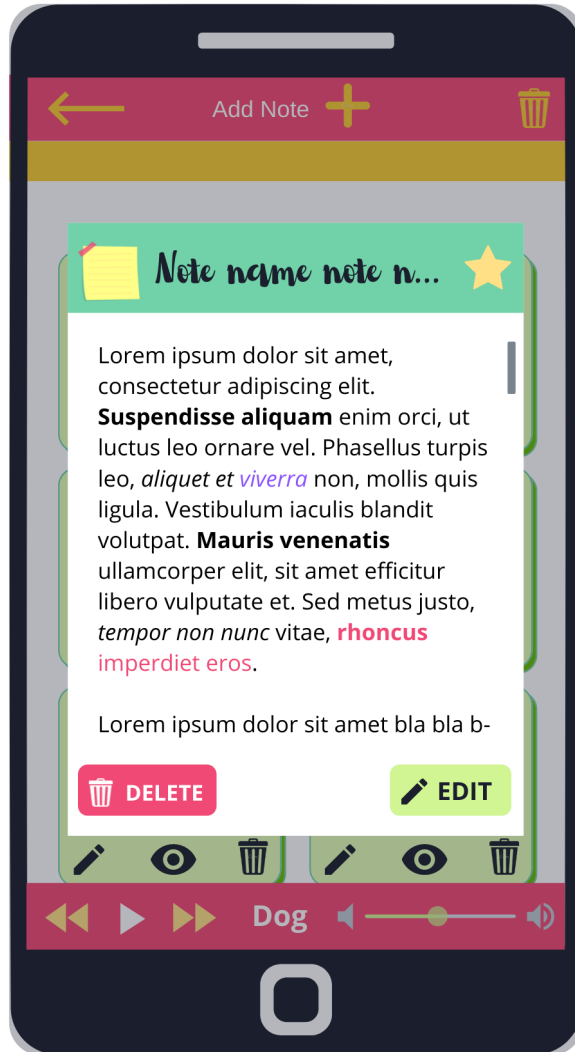

Notes appear neatly in
their folder pages

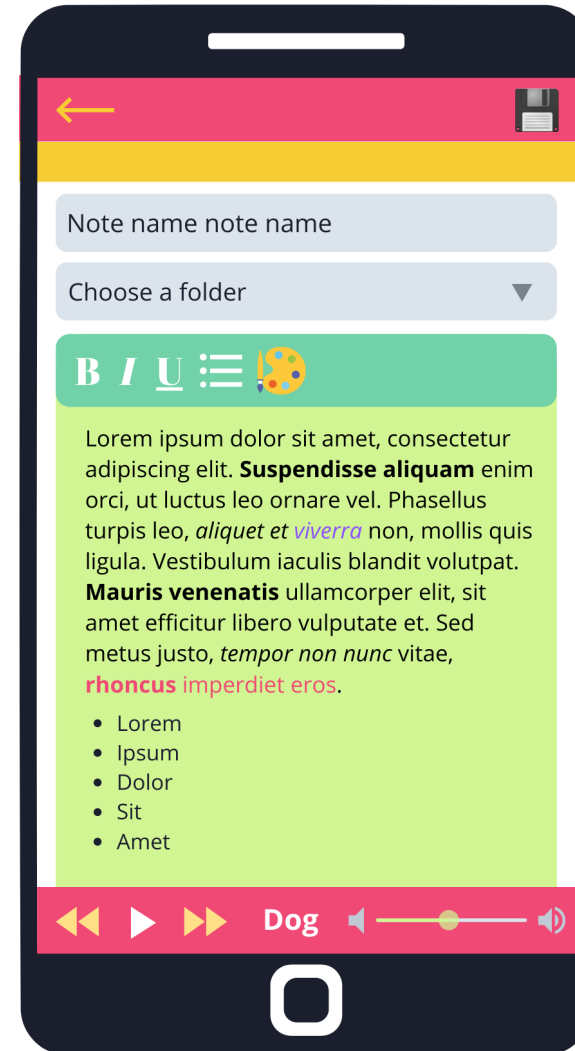

You can view the note
in a dialog

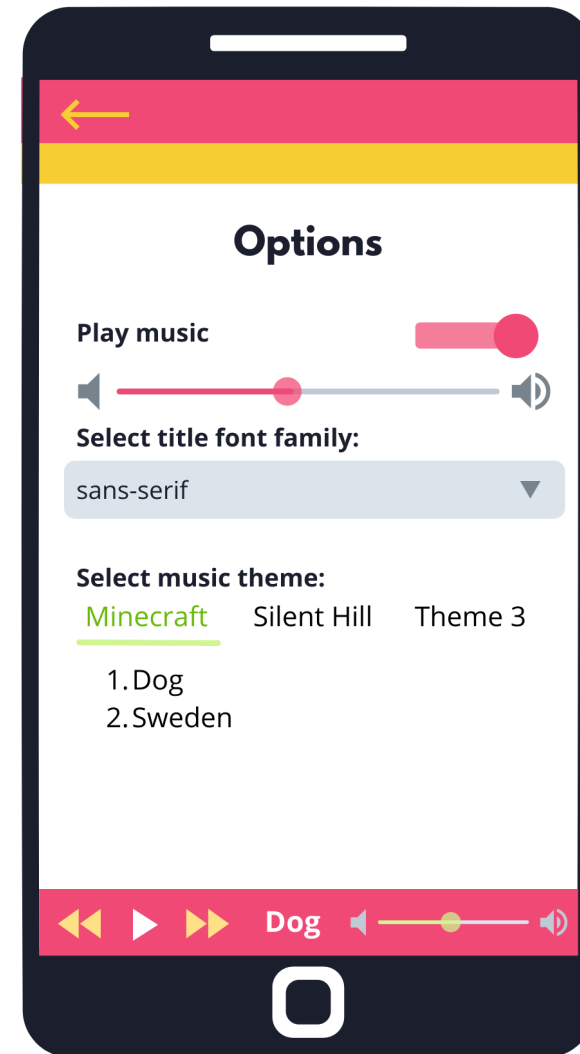

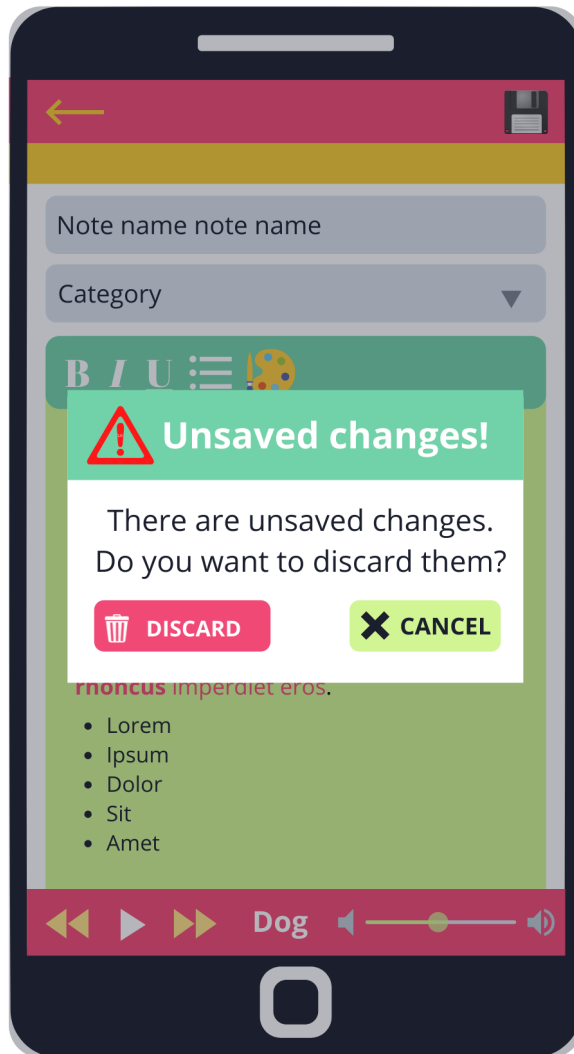

Editing an existing
note:

Don't forget to save!

Options page for customisation

Brief Testing Report:

The application was tested in two different emulators, and it executed on both of them successfully. The messages logged on LogCat indicated that the application executed all the functions it needed.

Input values were validated. Invalid folder names for folder creation:

- Empty string
- The name of an existing folder

Appropriate toast messages were shown on screen to give feedback to the user.
